Case study

Waubeeka Golf Links

Set in the beautiful Berkshire mountains, Waubeeka Golf Links is an 18-hole championship golf course located in Williamstown, Massachusetts.

Mike Deep, the owner, and Vicki Richardello, Mike's lifelong friend and general manager, are passionate about Waubeeka. They turned it into a top-ranked golf course with premium amenities that provide great golfing experience in a stunningly beautiful mountain scenery.

"So happy we installed EV charging stations at Waubeeka. It's an attractive premium amenity for our members and guests who can now charge their cars while playing golf. We support EV adoption and sustainable practices. I was pleasantly surprised with the overall project cost and available rebates and incentives."

Owner
Waubeeka Golf Links

Why Aetna Corp.?

"Aetna Corp. helped us select the EV charging solution that is right for our golf club. Their services are totally turnkey. They also took care of utility rebates on our behalf which significantly reduced our out-of-pocket expenses and saved us from doing the paperwork. EV charging is affordable, environmentally friendly and helps us stand out among other golf clubs."

Mike Deep
Owner of Waubeeka Golf Links

Turnkey EV Charging

The project scope included installation and activation of 3 dual port ChargePoint CT 4000 series EV charging stations, site excavation, restoration, new electrical service, obtaining all required permits and processing rebates on behalf of the customer.

Aetna Corp. would like to thank Waubeeka Golf Links for promoting e-mobility, its commitment to sustainability, and helping us put this case study together.
